

Discover the **SUSTAINABLE WORLD**

17 ADVENTURES FOR A BETTER PLANET

resilient communities
together

WELCOME TO THE WORLD OF SDGs!

Have you ever wondered how we can make the world a better place?

*The United Nations has created 17 Goals for a better world,
and we call them SDGs (Sustainable Development Goals).*

SUSTAINABLE DEVELOPMENT GOALS

Program run by the Academy for the Development of Philanthropy in Poland*

1 NO POVERTY

WHAT DOES IT MEAN?

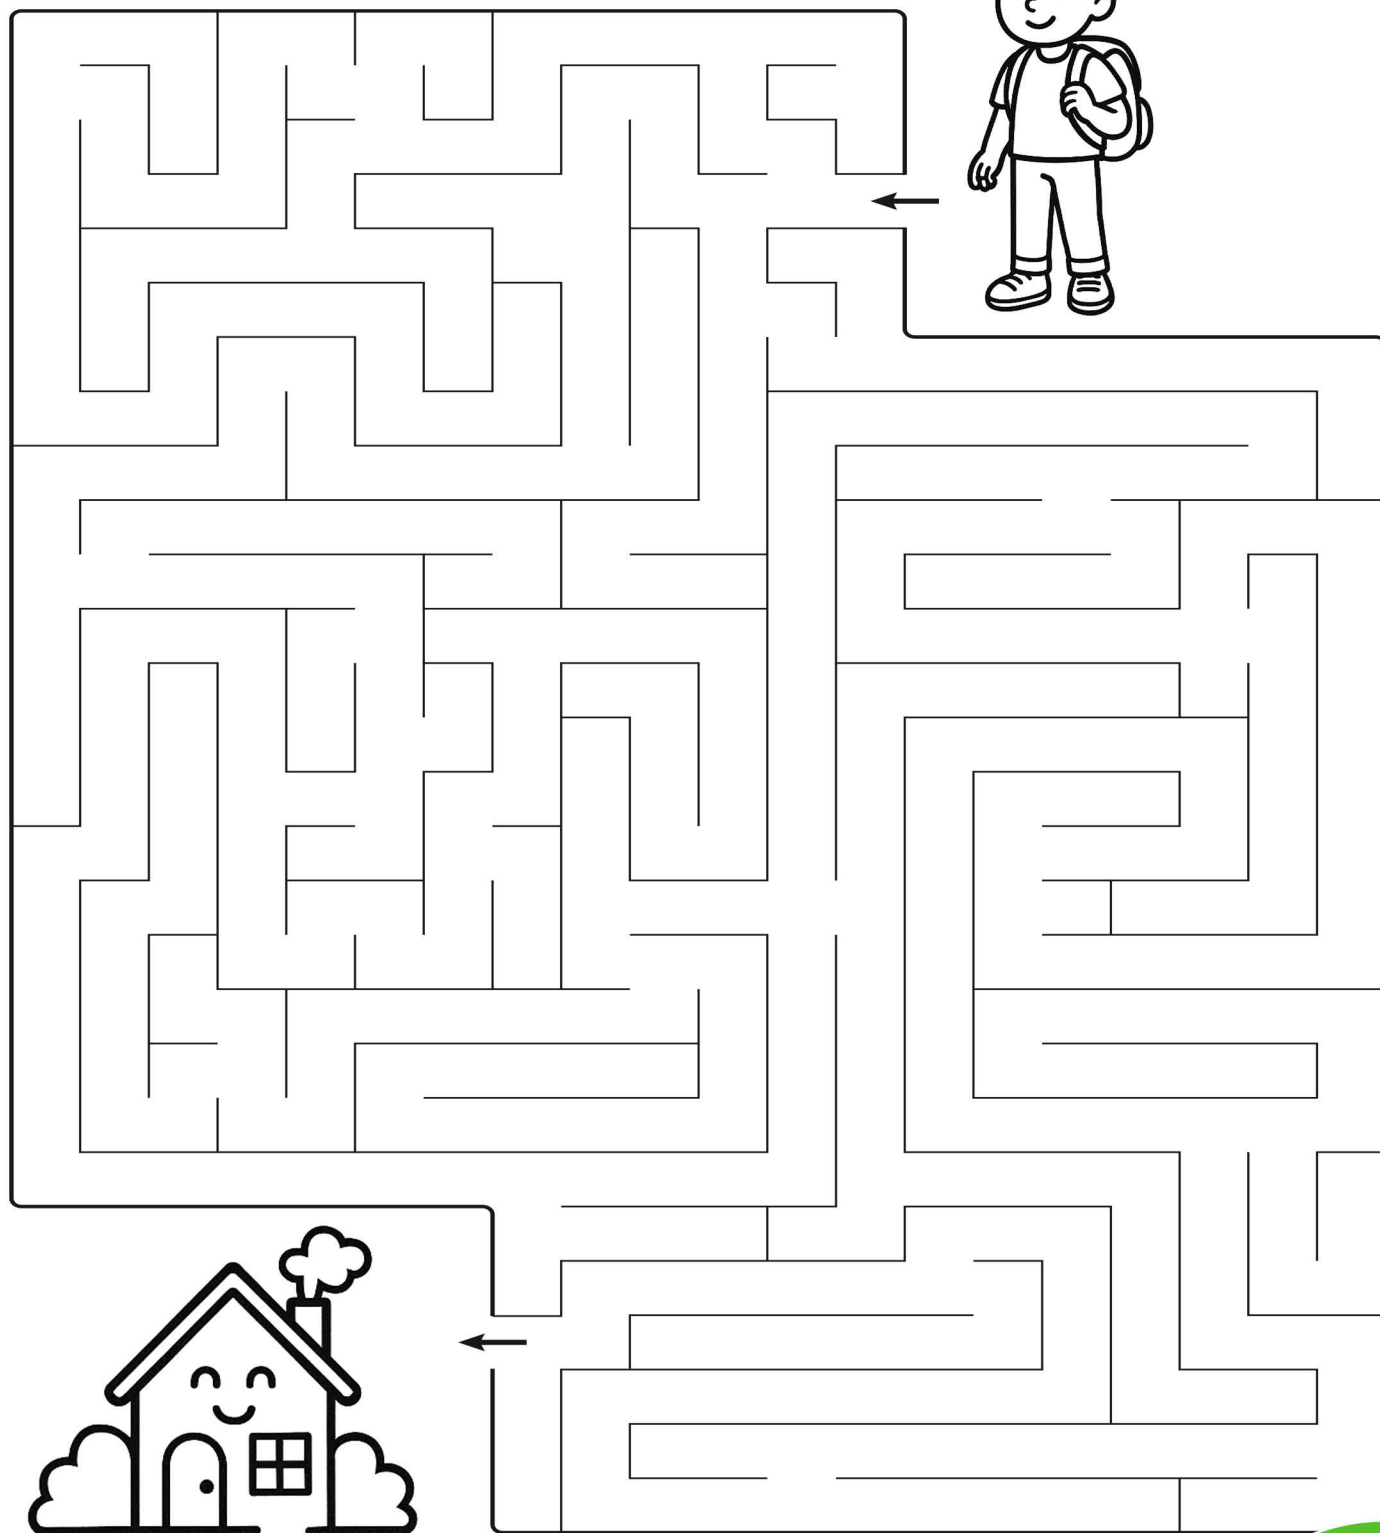

To make sure that everyone has what they need: a home, food, clothes, and a job. No one should go hungry or live on the streets.

ACTIVITY!

Find the way home!

Help Matei reach his house by following the correct path through the maze!

2

ZERO HUNGER

WHAT DOES IT MEAN?

All people, especially children, should have enough healthy food every day.
It's important to have access to nutritious foods to grow up strong and healthy!

ACTIVITY!

What do we put in the healthy food basket?

Color only the healthy foods in the picture:

What are you eating today to stay strong?

3 GOOD HEALTH AND WELL-BEING

WHAT DOES IT MEAN?

All people should have access to doctors, hospitals, and medicine.
But they should also take care of their body and mind: eat healthy, sleep well, wash their hands, and exercise.

ACTIVITY!

Connect the dots

Connect the dots and discover a surprise image!
After drawing it, color it in!

WHAT DOES IT MEAN?

All children in the world should go to school, learn to write, read, and explore the world. Education helps us dream big and make those dreams come true! ✨

ACTIVITY!

Find 9 differences!

Look at the two pictures.
One of them is slightly different.

👉 Bonus: Write below the pictures: "I like school because..."

5

GENDER EQUALITY

WHAT DOES IT MEAN?

Girls and boys are equally important. They all have the right to learn, play, and choose what they want to become when they grow up – and to be respected.

ACTIVITY!

Put **✗** if the person in the picture couldn't do the action, and **✓** if the person can do the action.

girl crying

6 CLEAN WATER AND SANITATION

WHAT DOES IT MEAN?

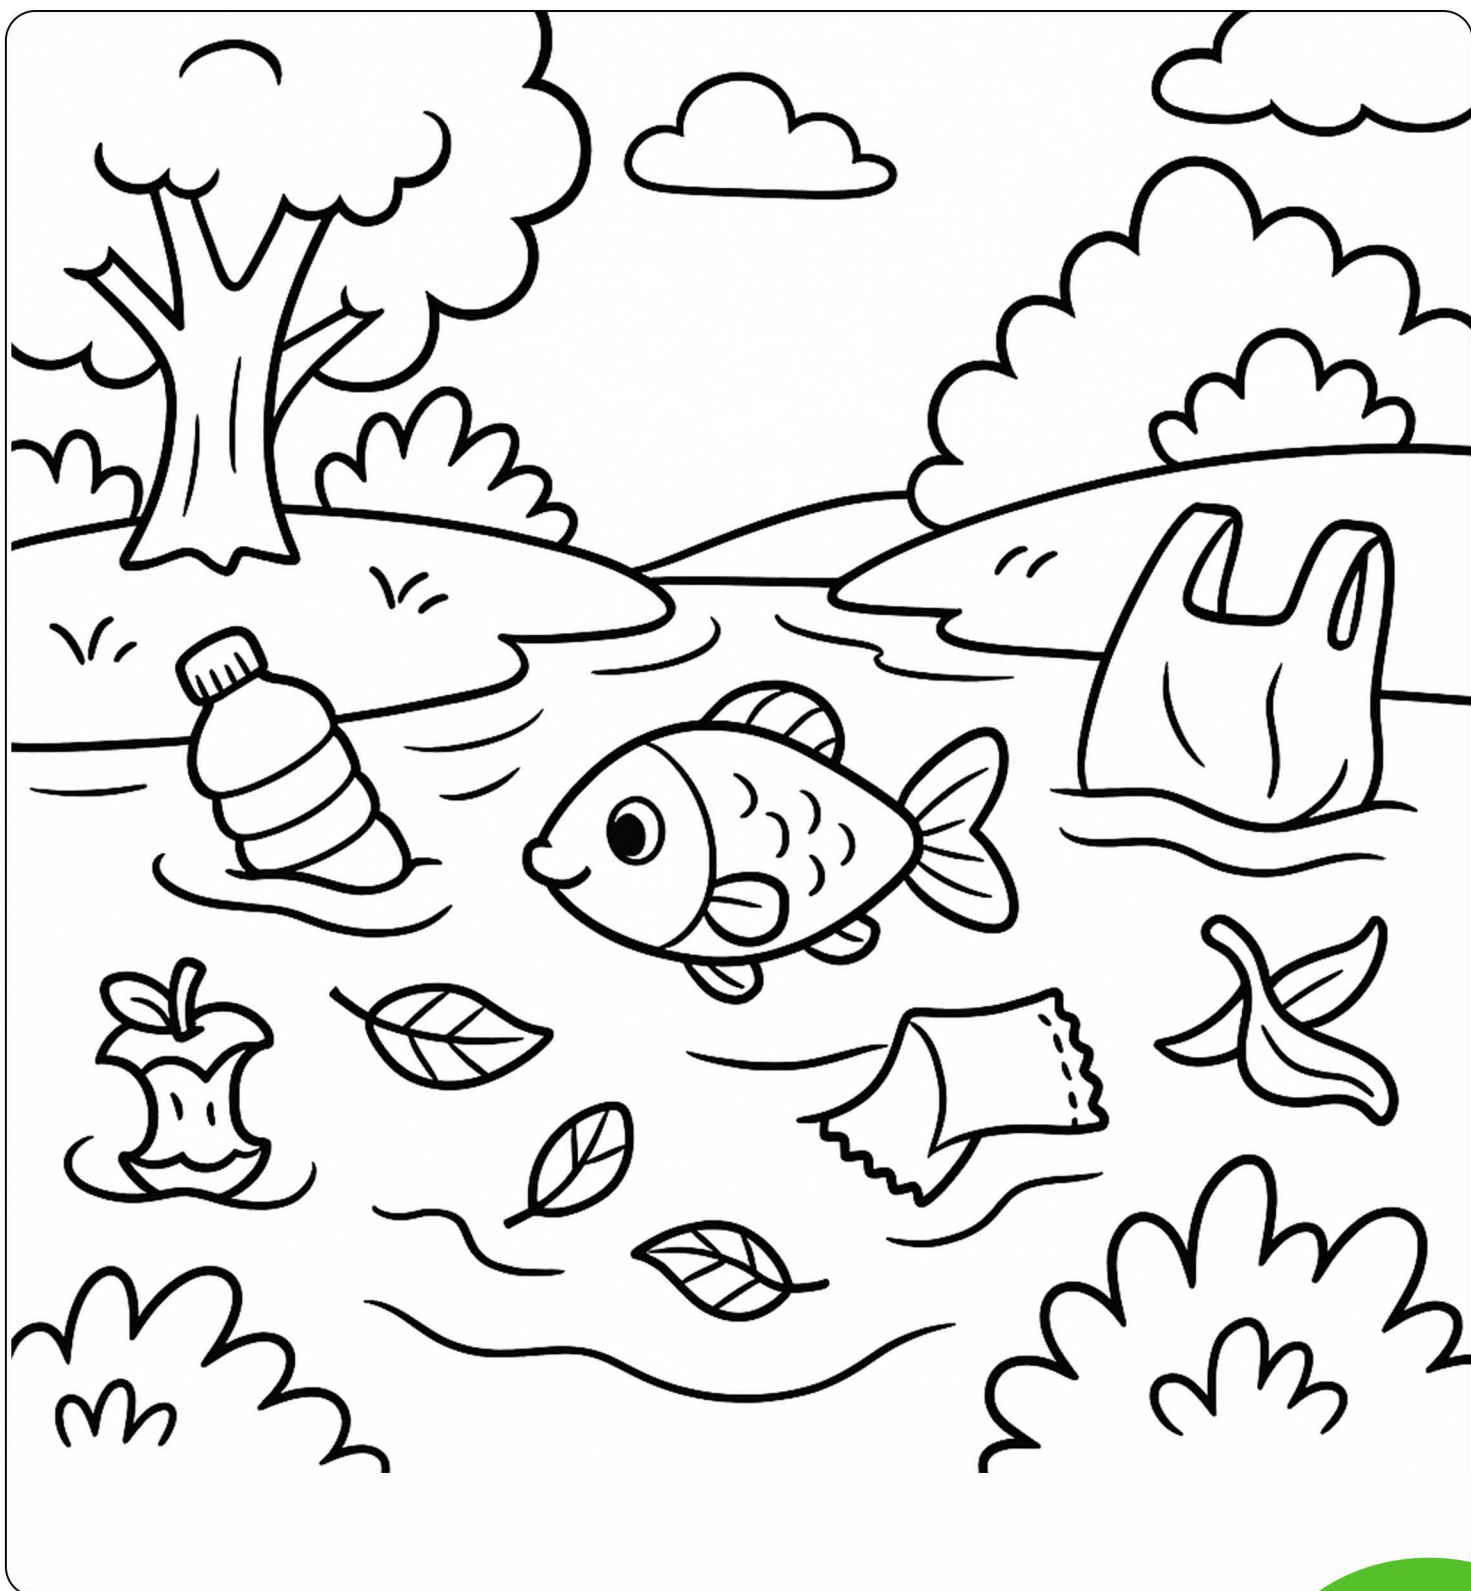

Clean water is essential for life! Everyone must have drinking water and access to clean toilets. Hygiene (washing hands, brushing teeth, etc.) helps us stay healthy.

ACTIVITY!

What should **NOT** be thrown into the water?

Look at the image of the river. Some things belong there, others don't! 🔍 Circle the objects that should **NOT** be in the water.

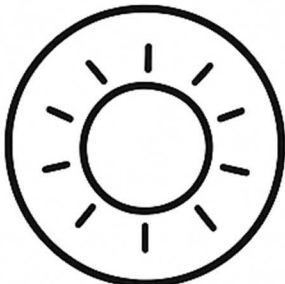

WHAT DOES IT MEAN?

We need energy for light, heat, cooking, and many other things. But we should use energy from sources that don't pollute, like the sun, wind, or water. That's what clean energy means.

ACTIVITY!

Connect each energy source with what can be done with it.

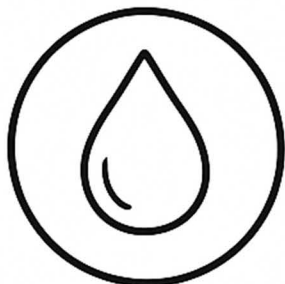

SUN

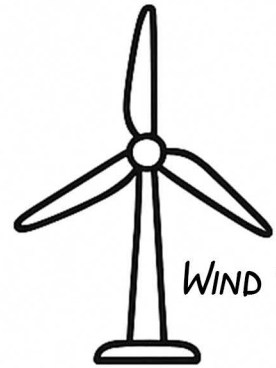

WATER

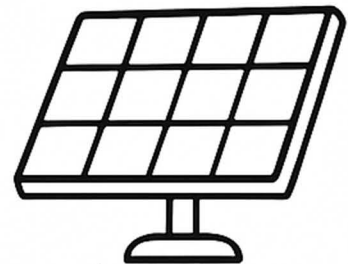

WIND

OIL

WIND TURBINE

SOLAR PANEL

POLLUTION

HYDROPOWER PLANT

DECENT WORK AND ECONOMIC GROWTH

WHAT DOES IT MEAN?

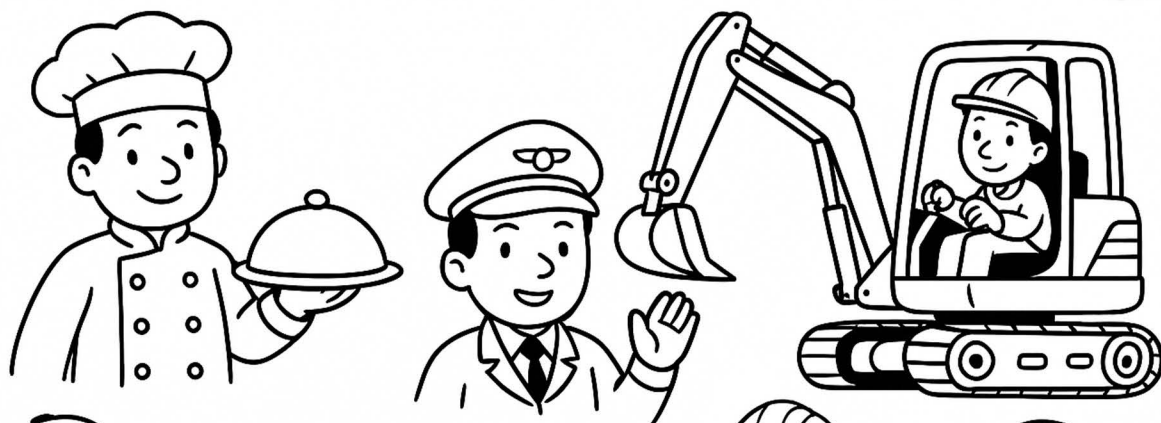

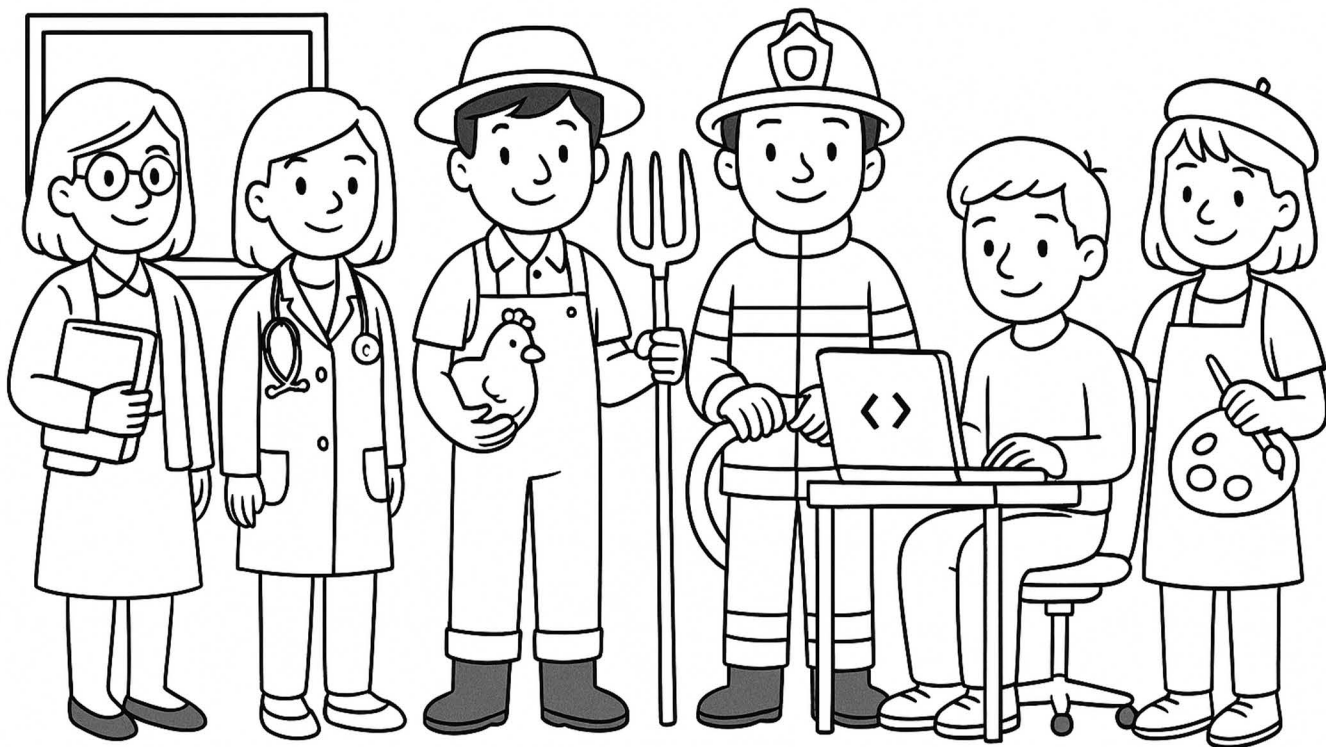

Adults need a job where they are respected, fairly paid, and safe. Children, on the other hand, should play and learn, not work!

ACTIVITY!

What job do you like?

Look at the pictures that show different professions. Color the image that shows the job you would choose for yourself.

9

INDUSTRY, INNOVATION AND INFRASTRUCTURE

WHAT DOES IT MEAN?

We need roads, bridges, hospitals, internet, and factories that work well and don't pollute. A modern world needs new ideas and smart buildings!

ACTIVITY!

Build the city of the future!

Draw (or complete) the image of a modern city.

10 REDUCED INEQUALITIES

WHAT DOES IT MEAN?

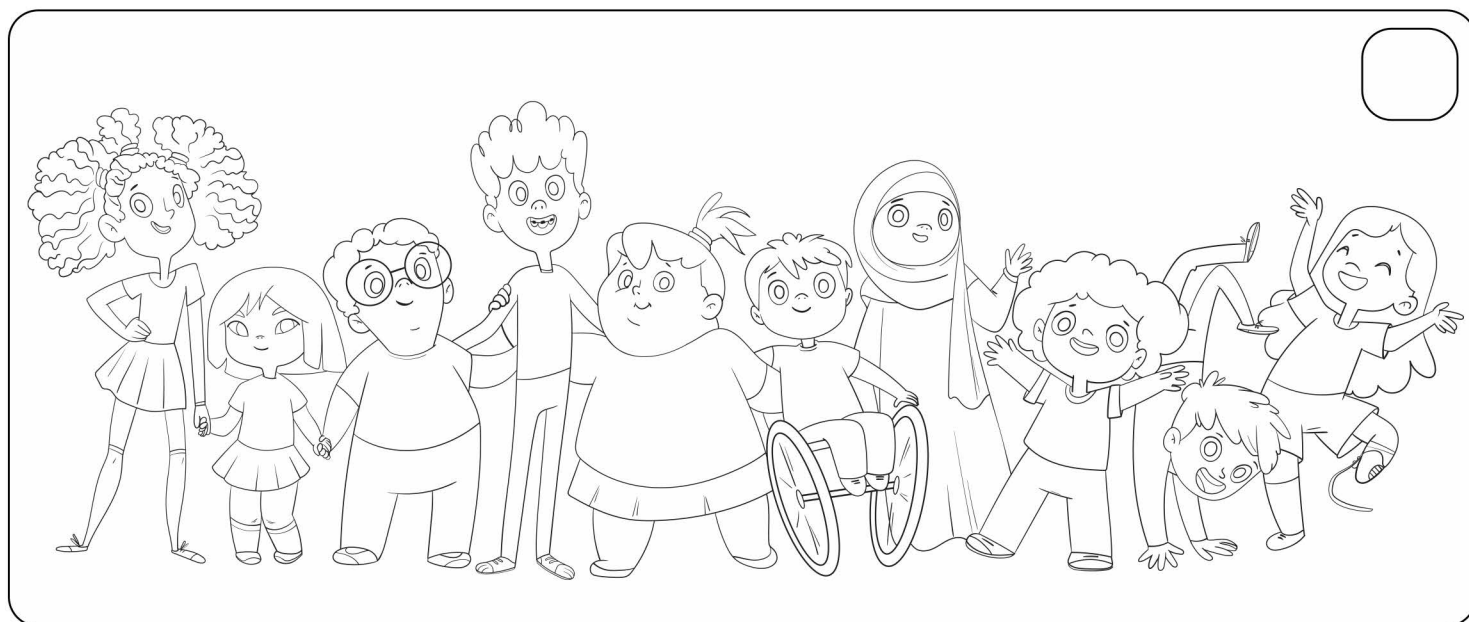

Every person, no matter what they look like, where they come from, whether they have a disability or speak another language, deserves to be treated with respect and have the same rights.

ACTIVITY!

Find the different people!

How many different people can you spot in the image below? Color the children who: play basketball / are on the seesaw / wear glasses.

ACTIVITY!

What can we reuse or recycle?

Task 1: Put the objects into the correct bin.

Task 2: Connect the collected items to possible products made after recycling.

13 CLIMATE ACTION

WHAT DOES IT MEAN?

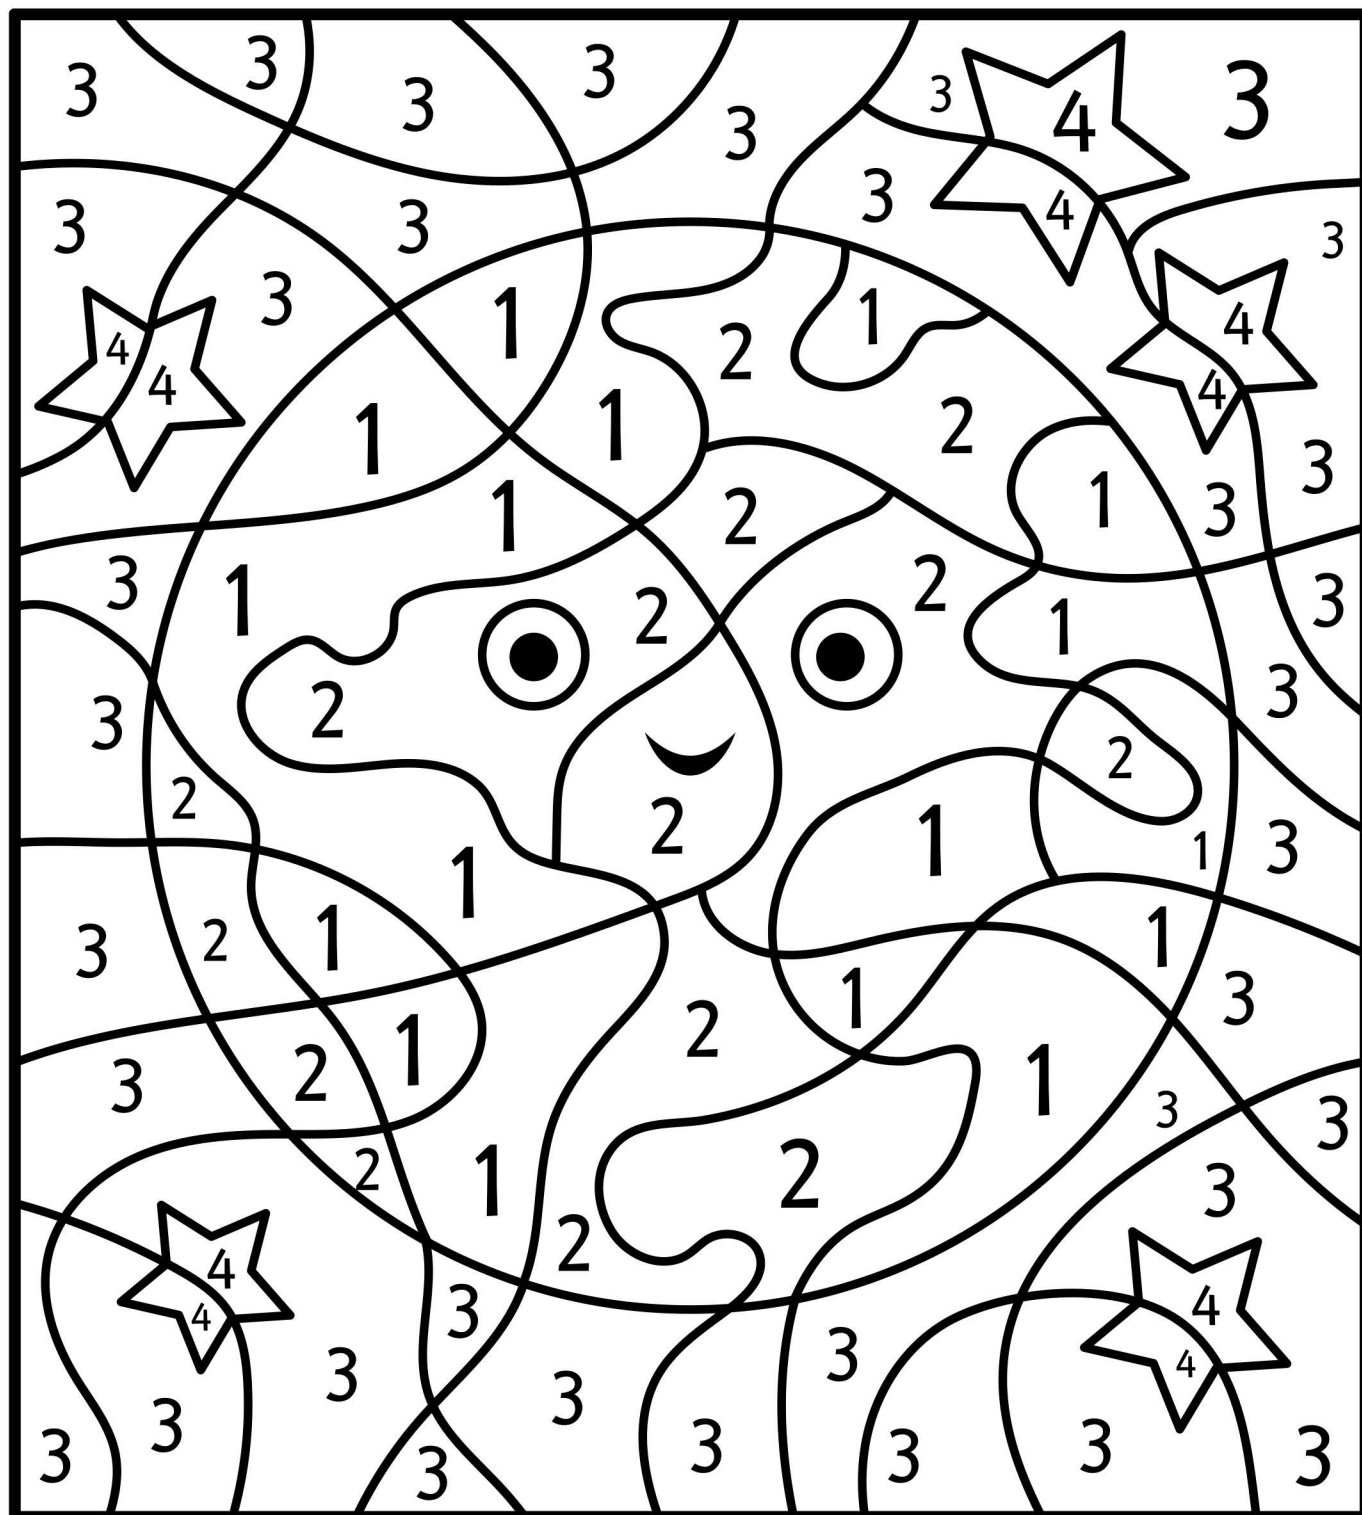

The climate is changing because of pollution. The Earth is warming up, and the weather is becoming more extreme. We must protect the planet: plant trees, walk more, and save energy.

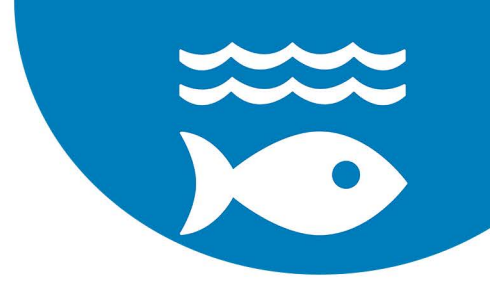

ACTIVITY!

Green Planet

Help Planet Earth regain its color:

14 LIFE BELOW WATER

WHAT DOES IT MEAN?

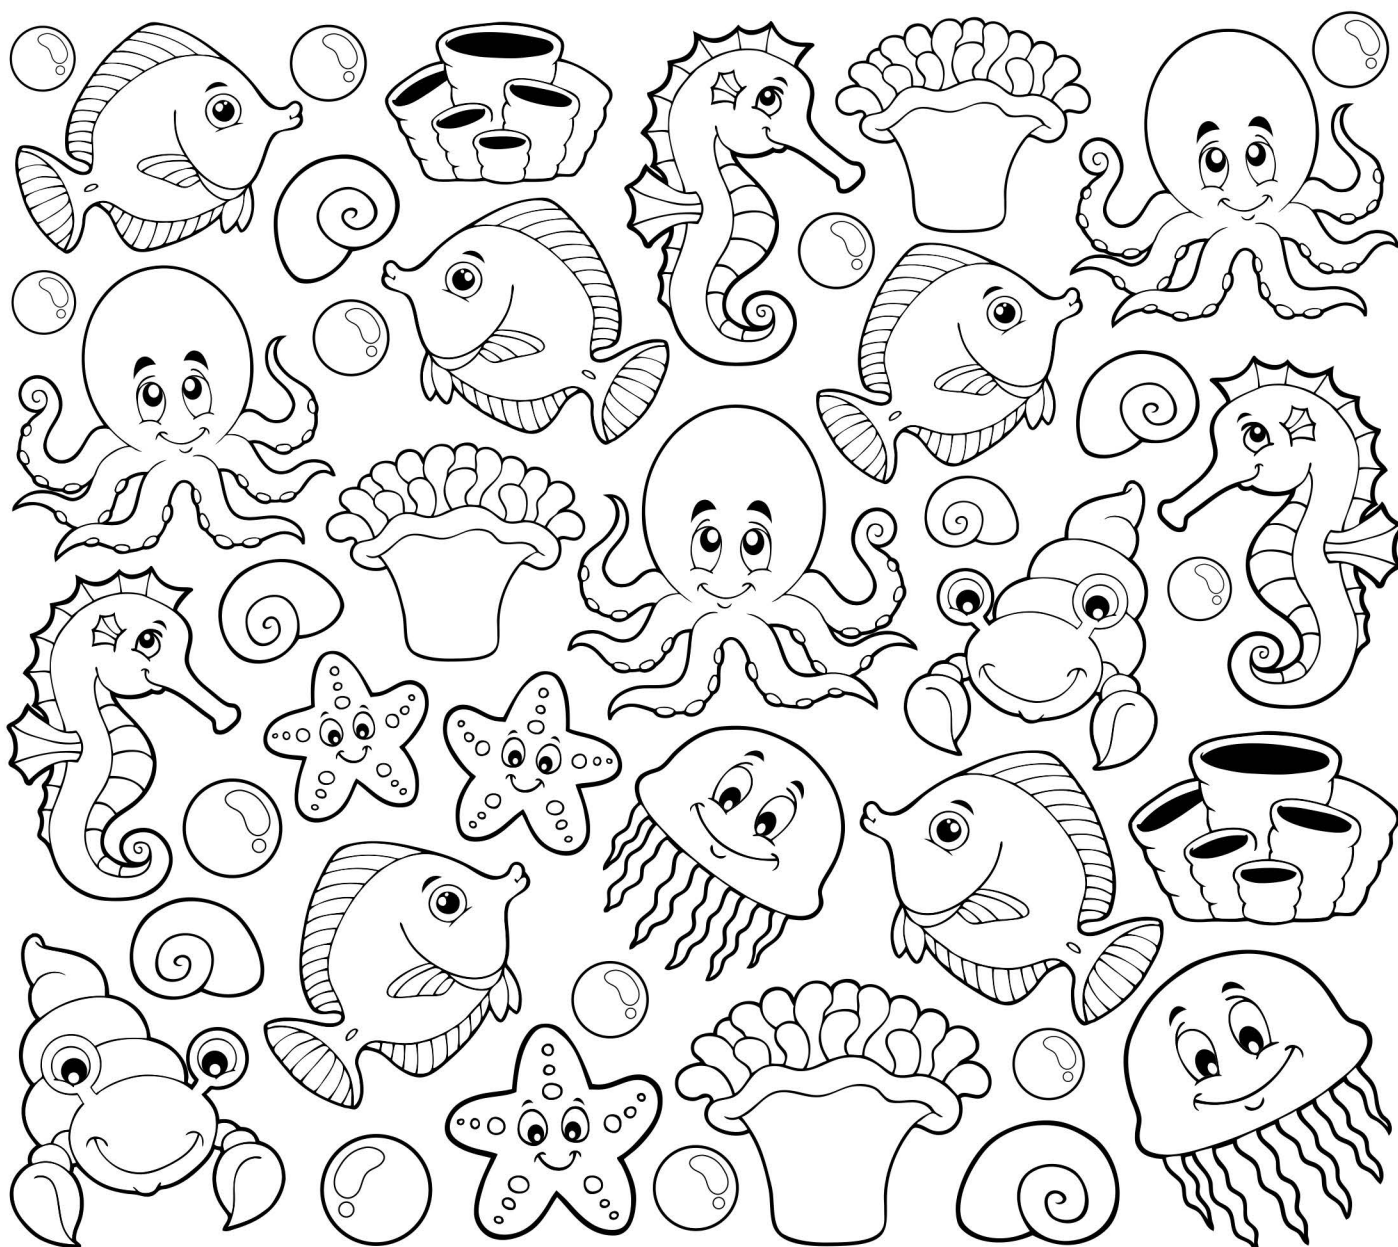

Water covers most of our planet.
Millions of creatures live in oceans and rivers.
If we throw trash into the water, we put them
in danger. We must keep the water clean for
fish, dolphins, corals — and for us too!

ACTIVITY!

Color the underwater world

Color and count how many of each sea creature
you can find!

15 LIFE ON LAND

WHAT DOES IT MEAN?

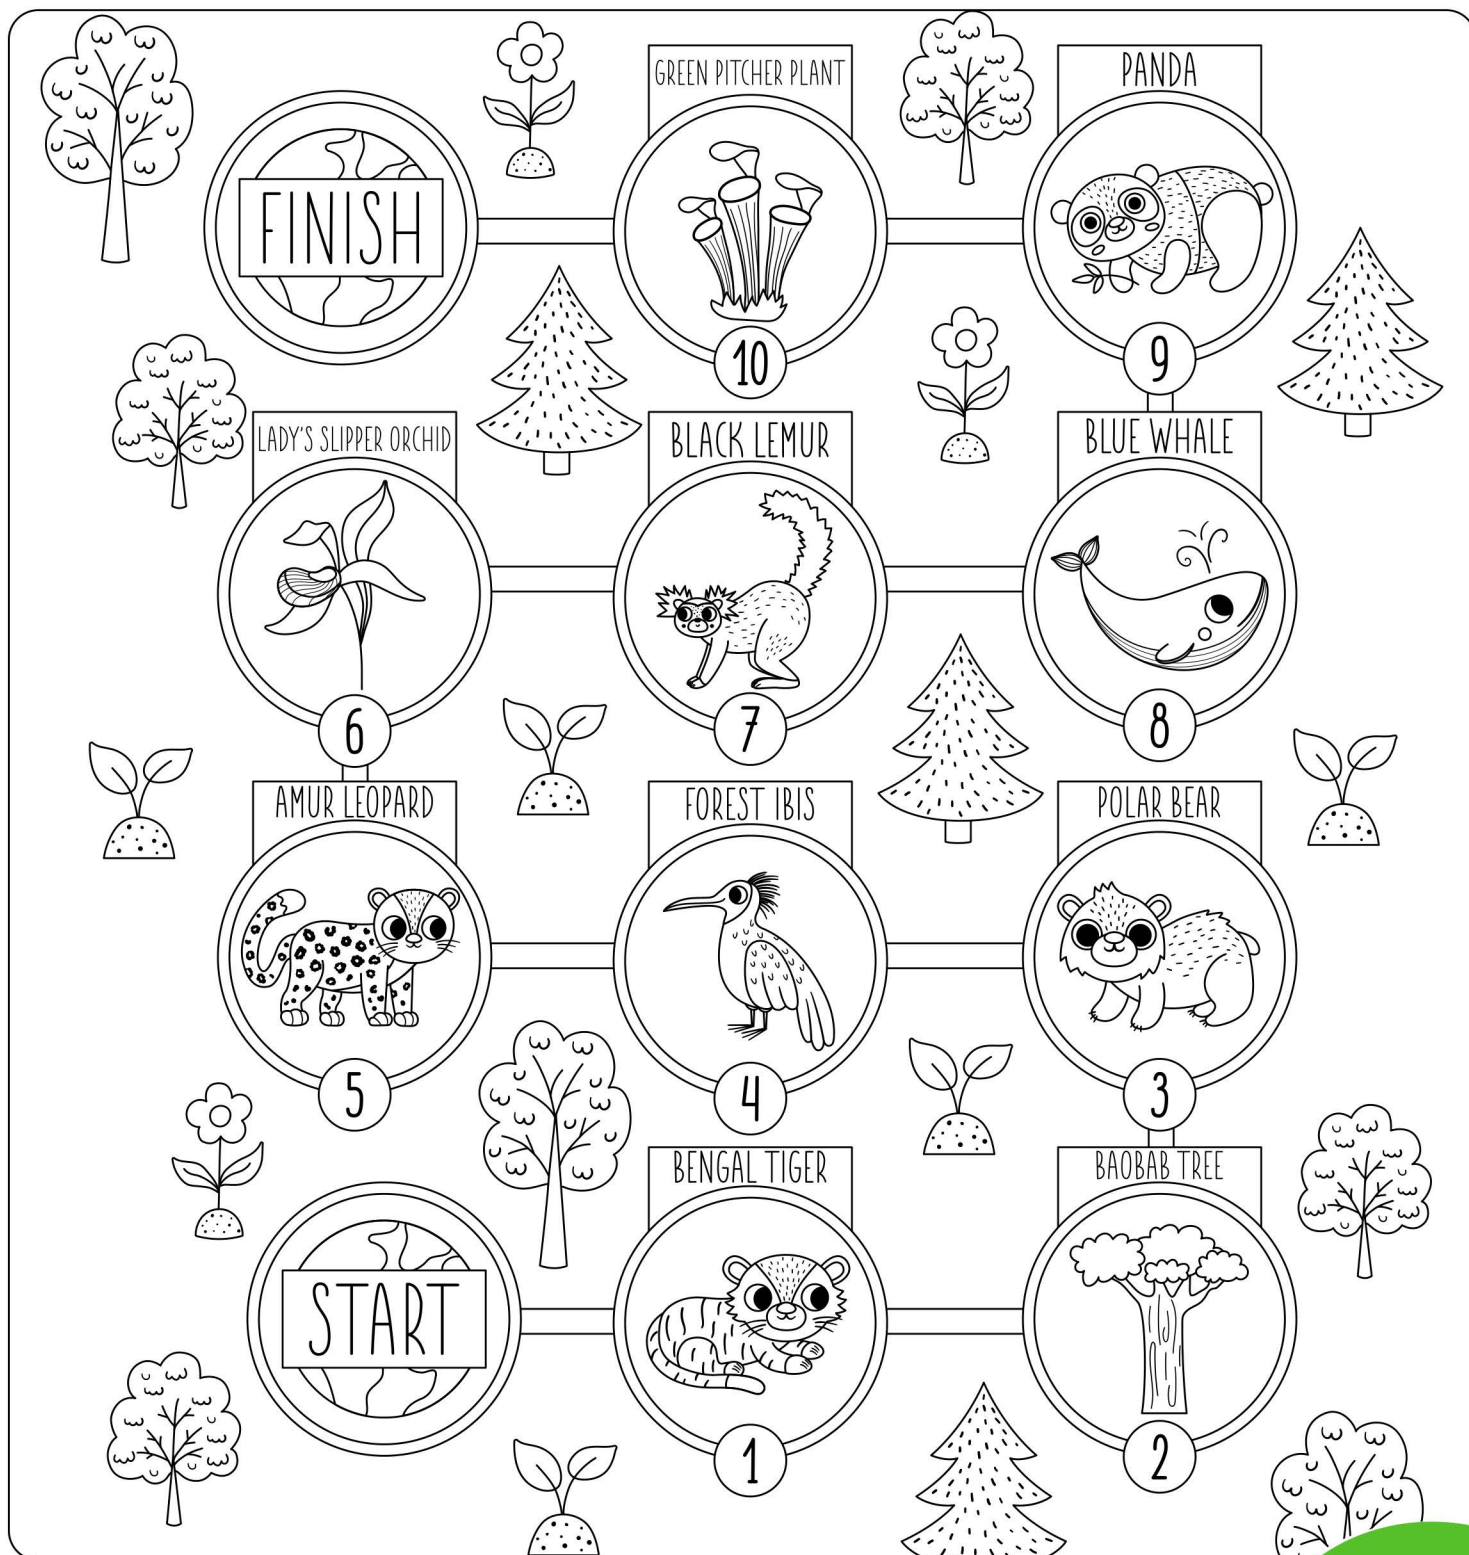

Forests are home to many animals and plants. They give us clean air, shade, and beautiful places to explore. We must take care of nature: don't cut down trees needlessly and protect wild animals.

ACTIVITY!

Learn

Color and learn about endangered species.

16

PEACE, JUSTICE AND STRONG INSTITUTIONS

WHAT DOES IT MEAN?

All people should live in safety, without fear.
The law must be fair for everyone.
We must learn to be honest, solve conflicts through dialogue, and respect the rules.

ACTIVITY!

Color the League of Justice!

17 PARTNERSHIPS FOR THE GOALS

WHAT DOES IT MEAN?

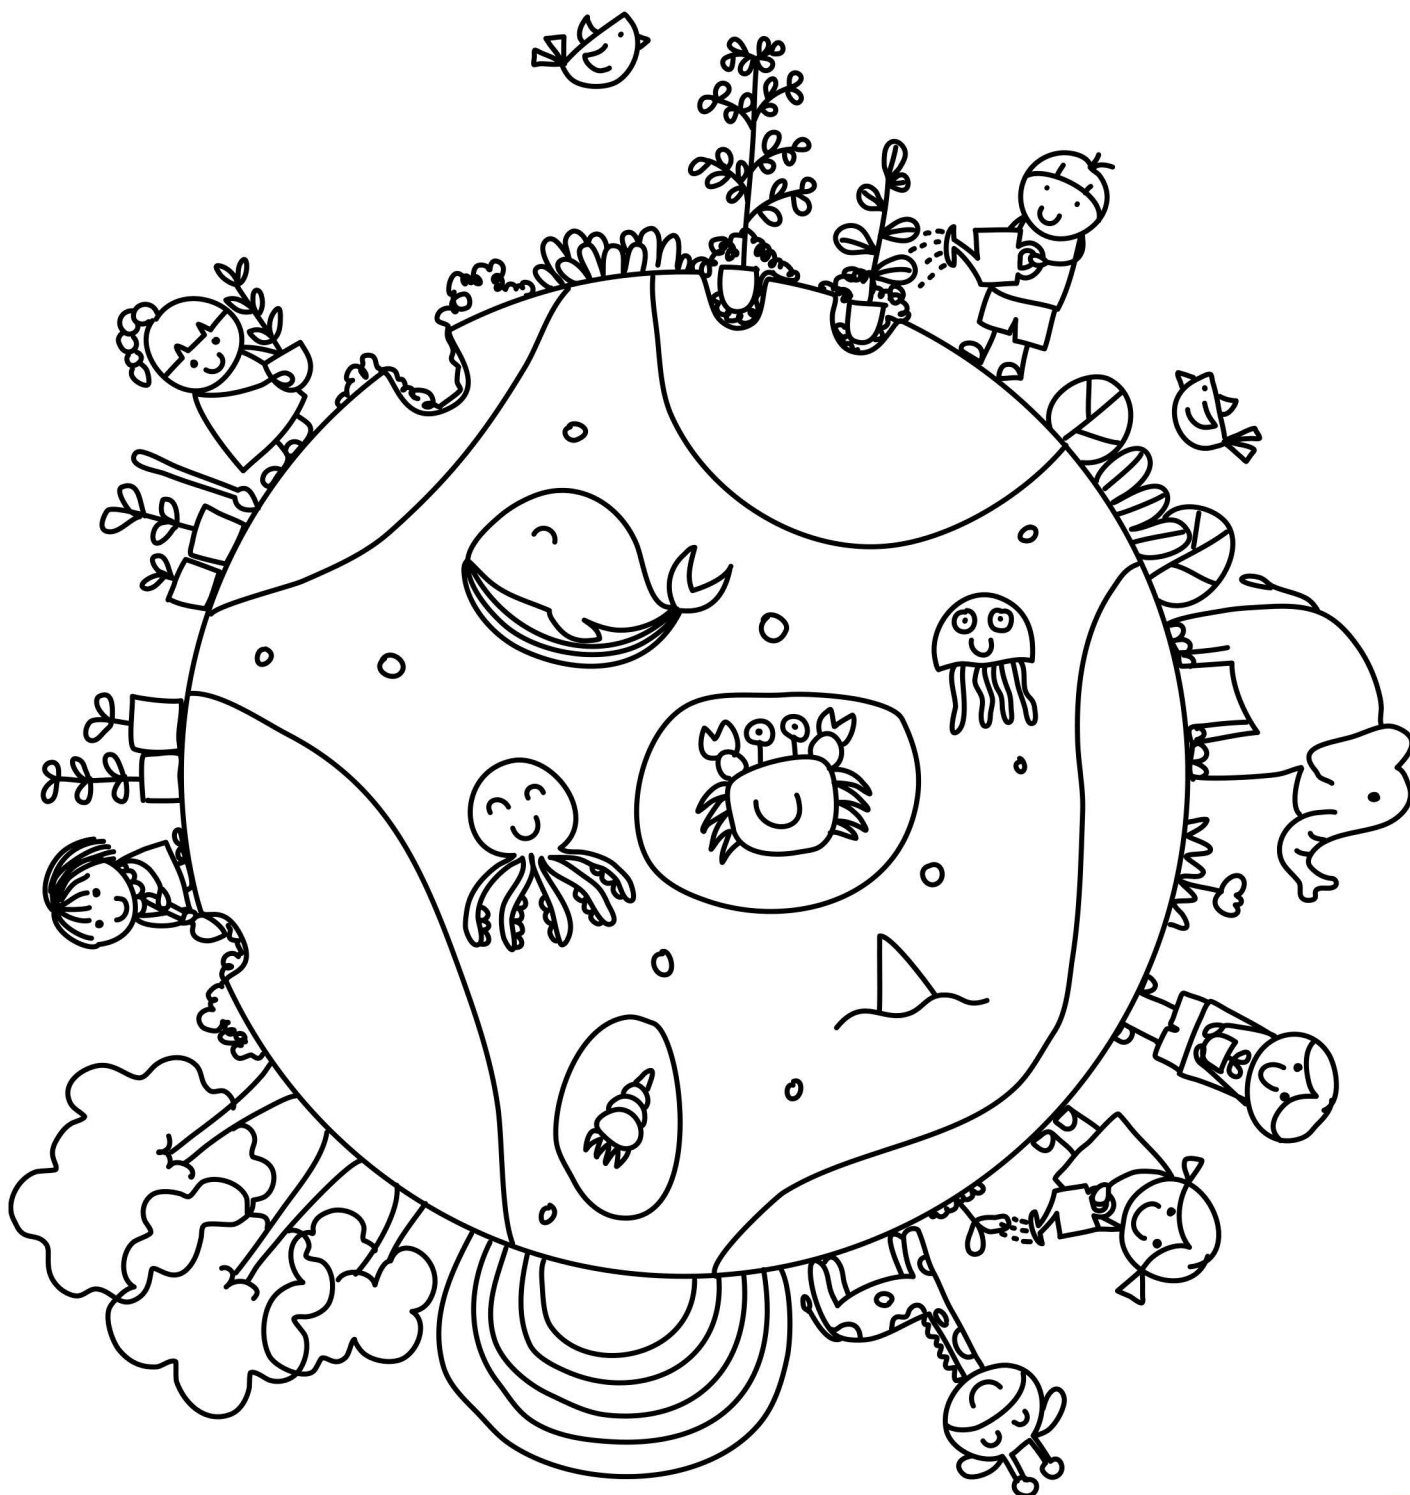

No one can change the world alone.
Countries, people, schools, and organizations
must work together.
Together, we can do more!

ACTIVITY!

Happy Planet

Color the happy planet!

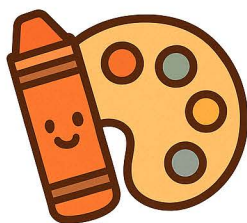

Discover the Sustainable World ***17 adventures for a better planet***

The United Nations has created 17 special goals to help the planet, people, and animals.

We call them Sustainable Development Goals – or simply, SDGs.

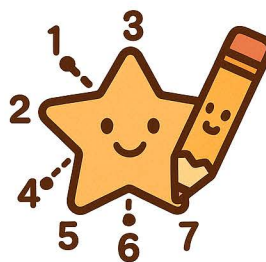

In this book, you will discover each of them through games and fun activities:

you color

**you spot
differences**

**you connect
the dots**

**you solve
challenges**

Let's learn together how to take care of nature, of people, and of the future!
